Education

Sep 2023 - Present
National Textile University, Faisalabad

BS Artificial Intelligence

Backend & Django Developer with AI Integration Skills :

I'm a backend developer skilled in Python, Django, and FastAPI. I build scalable web apps and APIs, and have hands-on experience integrating machine learning features into backend systems. I focus on clean code, database design, and continuous improvement.

- **Candy Crush-inspired game** – Made in C++ using a function-based approach (1st semester project).
- **Resume Analyzer** – A Python and Machine Learning project to analyze CVs (3rd semester project).
- **Online Study App** – Built using Django backend, similar to an online rooms system.
- **Space Invader Game** – Developed using Pygame for practicing 2D game development.
- **Remote Jobs Platform** – Served as a Backend Developer using FastAPI to build a platform for posting and finding remote job opportunities. [Link \(https://hr.growvy.online/\)](https://hr.growvy.online/)
- **Inventory Management System** – Built using FastAPI and SQLAlchemy with SQLite for managing products and stock via RESTful APIs.

Skills

Django, Fast Api Framework	Good
Python Programming	Good
SQL and Database Management	Good
HTML/CSS	Moderate
RESTful APIs	Good
