<https://abdullahbintahir.vercel.app/>

SUMMARY

Dynamic AI Developer dedicated to building autonomous systems and scalable, intelligent applications that solve complex real-world problems. Experienced in architecting autonomous workflows (LangChain, CrewAI), designing custom Retrieval-Augmented Generation (RAG) pipelines, and deploying robust AI models as highly scalable APIs

EXPERIENCE

- 03/2026 - Present

Faisalabad, Pakistan

AI Engineer
Paklogics

 - Build and deploy production-ready AI solutions, specializing in architecting robust RAG pipelines and developing computer vision systems
 - Implement advanced AI-driven features to solve complex, real-world problems and elevate overall system capabilities
- 07/2025 - 09/2025

Remote

ML Intern
DeveloperHubCorporation

 - Engineered Scikit-learn predictive models on real-world datasets to optimize the end-to-end AI development lifecycle
 - Collaborated with technical teams on domain-specific tasks to accelerate machine learning integrations
- 02/2025 - 08/2025

Remote

Backend Developer Intern
DK Recruitment

 - Developed web-based applications and built scalable REST APIs utilizing Django and FastAPI

EDUCATION

- 09/2023 - Present

Faisalabad, Pakistan

BS Artificial Intelligence
National Textile University

SKILLS

AI & Machine Learning

AI & LLMs, LangChain, CrewAI RAG, Pipelines, NLP, Computer Vision, Predictive Modeling, Time-Series ML

Programming & Frameworks

Python, Django, FastAPI, REST APIs, Scikit-learn

Tools & Version Control

Git, VS code, Jupyter notebook

PROJECTS

AI Marketing Content Engine

- https://github.com/AbdullahbinTahir42/crew_ai/tree/master/markintng-crew
- Created a multi-agent system automating marketing workflows, enabling agents to collaboratively research topics, devise content strategies, and draft SEO-optimized posts autonomously

AI News Analysis Tool

- <https://github.com/AbdullahbinTahir42/EquityNewsSearchTool>
- Built a RAG pipeline enabling natural language Q&A over article URLs to extract real-time insights from news sources instantly

Smoking Assistant Chatbot

- https://github.com/AbdullahbinTahir42/Smoking_Restrainer
- Developed an intelligent chatbot utilizing RAG technology and vector embeddings to retrieve and synthesize context-aware information for health-related user queries

Resume Analyzer

- <https://github.com/AbdullahbinTahir42/3rd-Semester-project>
- Designed a CV classification system implementing Decision Trees and NLP tokenization techniques to streamline the candidate screening process
